

**New Publication** ***NOW ON SALE !!***  
***Ultimate Compilation on Latest Research on Wool !!***

# Structure and Physical Properties of Wool

- Edited by Dr.Kozo ARAI and Dr. Kyohei JOKO
- First edition, published on August 25, 2016
- Published by SEN-I SHA CO., LTD.
- Size : B-5 paper size (Deluxe edition)
- Number of pages: 250
- Price : Japanese Yen10,000 (Excluding Tax) + Tax

**Special discount price :**  
**Japanese Yen 10,000 only**  
(including tax plus postage by EMS)

**From the Basics to Advanced Level has  
been Compiled into the World First Book  
by 23 Wool Scientists Representing  
Japanese Wool Specialists.**

**AN UP-TO-DATE  
TECHNICAL BOOK ON WOOL FIBER**

*Usable for versatile purposes*

- ▶ *For the development of natural fibers and synthetic fibers.*
- ▶ *For dyeing and finishing, planning and development of commodities.*
- ▶ *For apparel-making, fashion and distribution.*
- ▶ *For official testing and a variety of inspection organizations.*
- ▶ *For universities, researchers and cosmetic industry.*

**Structure and  
Physical Properties  
of Wool**

Edited by Dr. Kozo ARAI and Dr. Kyohei JOKO

**The world's first book in which the existence of 18-MEA in epicuticle has been clarified !!**

★ Please order this book by order form printed on the reverse side.  
We will send a self-explanatory invoice. A book will be  
sent after confirmation of your payment.

# Seven wonders of wool fiber become clear now !

For University Teachers, Fiber Researchers, and Hair Researchers

## Contents

### Part 1 Basic Course

#### Explanatory Note

#### Chapter 1 Wool and Animal Hair

- 1.1 The History of Mankind and Sheep Wool  
by Teruo OUCHI
- 1.2 Relatives of the Sheep  
by Teruo OUCHI
- 1.3 Fiber Identification  
by Norio NAGASAWA
- 1.4 Wool Grease  
by Norio NAGASAWA

#### Animal Hair and the Electron Micrograph

#### Chapter 2 Wool Fiber Structure

- by Hiroshi SAKABE
- 2.1 Morphology and Structure
- 2.2 Cuticles
- 2.3 Cortex
- 2.4 CMC
- 2.5 Microstructure

#### Chapter 3 The Seven Wonders of Wool

- by Ryo UMEHARA
- 3.1 Repels water but also absorbs water
- 3.2 Dyes well but is not easily soiled
- 3.3 The cells breathe even though they are lifeless
- 3.4 Absorbs water but is excellent in heat retention
- 3.5 Difficult to burn
- 3.6 Spinnability and felting property
- 3.7 Excellent resilience due to shape memory

#### Chapter 4 Performance in Terms of Consumption

- 4.1 Fiber Fineness and Fiber Length  
by Yutaka SHIBATA
- 4.2 Prickle Sensation  
by Yutaka SHIBATA
- 4.3 Elasticity  
by Yutaka SHIBATA
- 4.4 Pilling and Nep  
by Michiko MITSUI
- 4.5 Abrasion and Shine  
by Michiko MITSUI
- 4.6 Morphological Stability and Shrinkage  
by Michiko MITSUI
- 4.7 Setting  
by Norio NAGASAWA
- 4.8 Hygral Expansion (HE)  
by Norio NAGASAWA
- 4.9 Felting Property  
by Kozo SHIMAZAKI  
by Norio NAGASAWA
- 4.10 Deodorizing Function  
by Ryo UMEHARA
- 4.11 Metal Adsorption  
by Ryo UMEHARA
- 4.12 The Hand of a Fabric  
by Takeichiro BABA

#### Chapter 5 Theories of Physical and Chemical Properties

- 5.1 Mechanical Properties of a Wool Fiber  
by Mitsuo MATSUDAIRA

- 5.2 Chemical Properties  
by Kozo ARAI
- 5.3 Relation with Water  
by Mitsuhiro FUKUDA
- 5.4 Consumption Characteristics  
by Naoko NAGASHIMA  
by Toru TAKAGISHI
- 5.5 Thermal Properties  
by Kyohei JOKO
- 5.6 Light-Related Properties  
by Natsuko KOHARA

#### Chapter 6 Instrumental Analysis

- 6.1 Microscopic Observations of Wool Fibers  
by Michiko OKADA  
by Teppei NAWA
- 6.2 X-ray Diffraction  
by Takashi ITOU
- 6.3 Infrared and Raman Spectroscopy  
by Akio KUZUHARA
- 6.4 Differential Scanning Calorimetry DSC  
by Kyohei JOKO
- 6.5 XPS  
by Mitsuru TAHARA
- 6.6 MS and TOF-SIMS  
by Masayuki OKAMOTO

### Part 2 Applied Course

#### Explanatory Note

#### Chapter 1 Molecular Structure of Keratin

- by Kozo ARAI
- 1.1 Chemical Composition
- 1.2 Chemical Structure of the Cortex

#### Chapter 2 Morphological Structure of Wool

- by Kozo ARAI
- 2.1 Structure of the Cuticle
- 2.2 The Allwoerden Reaction
- 2.3 18-Methyleicosanoic Acid
- 2.4 Opening and Closing of the Scales
- 2.5 Differential Frictional Effect of the Fiber Surface

#### Chapter 3 Structure of the Cortex

- by Kozo ARAI
- 3.1 Features of the Cortex Tissue Structure
- 3.2 Secondary Structure of IF Proteins
- 3.3 Aggregation Structure of IF Filaments
- 3.4 Matrix Component Proteins

#### Chapter 4 Structure of the Cell Membrane Complex

- by Kozo ARAI
- 4.1 Internal (Structural) Lipids of Wool
- 4.2 Microscopic Structure of CMC
- 4.3 Structure and Function of the Cuticle Surface Lipid, 18-Methyleicosanoic Acid
- 4.4 External Environment Dependence of the Epicuticular Membrane Surface

#### Chapter 5 Structure of Disulfide Crosslinks

- by Kozo ARAI
- 5.1 Introduction
- 5.2 Characterization of the SS Crosslinks of a Keratin Fiber

- 5.3 Application of Network Elasticity Theory to Swollen Keratin Fibers
- 5.4 Application to Boiling-Water-Treated Fibers
- 5.5 Types and Numbers of SS Crosslinks of the IF Molecule
- 5.6 Locations, Types and Numbers of SS Crosslinks on the IF Chain
- 5.7 Aggregate Structures and Numbers of Intramolecular and Intermolecular Crosslinks of KAP Molecules and Bonding Between an IF Chain and a KAP
- 5.8 Conclusion

#### Chapter 6 Sorption Positions of Water and Roles Thereof

- by Kozo ARAI
- 6.1 Adsorption/Desorption Isotherm
- 6.2 Humidity Change in the Strength - Elongation Curve
- 6.3 Hydration and Swelling
- 6.4 Water Inside Microstructures
- 6.5 Glass Transition Temperature Tg and Moisture Content of Wool Fiber

#### Chapter 7 The Wool Fiber — A Cell Assembly with the Ordered Non-Uniform Structure

- by Kyohei JOKO
- 7.1 Introduction
- 7.2 Dye Distribution in Practical Dyeing
- 7.3 Dyeing Affinity of Histological Components
- 7.4 Macroscopic (Hierarchical) Structure of Keratin Fibers
- 7.5 Non-Uniform (Differential) Dyeing Seen in Merino Wool Fibers
- 7.6 Advantages due to Non-Uniformization Treatment
- 7.7 Conclusion

#### Chapter 8 Comfort of Wool Products

- by Teruko TAMURA
- 8.1 Comfort of Clothing
- 8.2 Methods for Evaluating Comfort
- 8.3 Comfort of Wool Products
- 8.4 Climate Adaptation by Clothing and the Comfort of Wool Products
- 8.5 Comfort of Wool Products under Cold Conditions
- 8.6 Comfort of Wool Products under Hot Conditions
- 8.7 Comfort of Wool Products in Cool Biz Fashion

#### Chapter 9 The Science of Fabric Hand

- by Mari INOUE
- 9.1 Concepts of the Touch or "Hand" of a Fabric
- 9.2 Standardization of Sensory Evaluation of Fabric Hand
- 9.3 Basic Mechanical Characteristics and Surface Characteristics of Fabrics
- 9.4 Objective Evaluation of the Fabric Hand
- 9.5 Measurement System for Objective Evaluation of Hand
- 9.6 Mechanical Properties and Surface Characteristics of a Fabric of Satisfactory Tactile Sensation
- 9.7 Objective Evaluation of Hand and Material Design

#### Index

Order Form to buy at a special discount price (J.Y.10,000 Only incl. tax plus postage by EMS) for those who are recommended by the authors or Japan Wool Industry Association

Order by FAX at +81(0)6-6263-1899

I would like to buy  copy (ies) of "Structure and Physical Properties of Wool" at a special discount price.
